Reviewer's report

Title: Safety relevant Knowledge of orally anticoagulated Patients: a Baseline Survey in Primary Care

Version: 1 Date: 12 March 2014

Reviewer: Marwa M. Fawzi

Reviewer's report:

The research is interesting and informative as a

Discretionary Revision:
I would like to mention that I thought it would be better if the authors had included any history of patient education about the OAT at their healthcare facilities as a question in their survey and if the patient had any knowledge about OAT where did he get it to help target the possible processes of improving patient knowledge as a beneficial recommendation of the study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
