Reviewer’s report

Title: Predictors of ICS/LABA prescribing in COPD patients: A study from general practice

Version: 1 Date: 22 January 2014

Reviewer: Richard Dekhuijzen

Reviewer’s report:

This are nice data from a real life situation.

Minor remarks:
1. The data could be presented a little more condensed and shorter.
2. Are there data on duration and severity of previous exacerbations and whether this affected the choice to prescribe ICS/LABA?
3. Are there data on evaluation of the success of ICS/LABA and subsequent continuation or discontinuation?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
