Reviewer's report

Title: Family doctors' involvement with families in Estonia

Version: 5 Date: 20 September 2004

Reviewer: Anja Marjatta Taanila

Reviewer's report:

General

I have revised the resubmitted manuscript and the responses given by the authors. Everything seems to be ok and I suggest that the manuscript is now ready for publication.

-------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Only minor revision has to be made in abstract because I think that in the methods there is a mistake. The authors write "Altogether 146 FDs responded to the questionnaire (response rate 62%), while five of them were excluded..." In the methods section on page 5 the authors write that 151 FDs returned the questionnaire and five were excluded... I think that this part needs to be checked.

-------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
