Reviewer's report

Title: Trends in the prevalence and management of diagnosed type 2 diabetes 1994-2001 in England and Wales

Version: 2 Date: 18 February 2005

Reviewer: Denise Kendrick

Reviewer's report:

General

I am now happy with the revised version of this paper, except for the minor point below

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

There were no legends attached to the figures on the version I received to review

----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
