Reviewer's report

Title: Herpes encephalitis presenting as mild aphasia

Version: 2 Date: 16 February 2006

Reviewer: elisabeth puchhammer

Reviewer's report:

General
The changes made by the authors are in agreement with my previous suggestions.

-------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No
