Reviewer's report

Title: Female asylum seekers with musculoskeletal pain: the importance of diagnosis and treatment of hypovitaminosis D3

Version: 4 Date: 9 November 2005

Reviewer: Peter Robert M Ebeling

Reviewer's report:

General
The authors have addressed the reviewers' comments adequately, and the manuscript has been improved as a result. The English is of an adequate standard.

----------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

----------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

----------------------------------------

Discretionary Revisions (which the author can choose to ignore)

----------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
