Reviewer's report

Title: Conducting research in individual patients: lessons learnt from two series of N-of-1 trials

Version: 1 Date: 25 May 2006

Reviewer: Roman Jaeschke

Reviewer's report:

General
Generally, this paper reinforces the observations and suggestions of previous authors in the field. It is written (and potentially useful) for those who are interested in conducting their own N-of-1 RCTs.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Nil

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Nil

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
