Title: Implementing referral guidelines: Lessons from a negative outcome cluster randomised factorial trial in general practice ISRCTN10184669

Version: 3 Date: 4 October 2006

Reviewer: michael thompson

Reviewer's report:

General
Their responses are satisfactory and the paper has been improved. I think it should now be accepted.
-----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
-----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
-----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
