Reviewer's report

Title: Does Family Medicine training in Thailand affect patient satisfaction with primary care doctors?

Version: 5 Date: 21 March 2007

Reviewer: murray lough

Reviewer's report:

General

the authors have done well in addressing the reviewers' comments. the paper is now more context-specific and modest in its recommendations.

the conclusion regarding further research to assess representativeness is particularly relevant.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

addressed

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
