Reviewer's report

Title: The use of CAM and conventional treatment among primary care consulters with chronic musculoskeletal pain

Version: 2 Date: 22 March 2007

Reviewer: Alison M Elliott

Reviewer's report:

General
The author's revised manuscript has addressed all the issues raised in my original review in a clear and effective manner and I have no additional points to raise. Congratulations to them on this useful and interesting contribution to the literature.

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
