Reviewer's report

Title: Interpersonal psychotherapy (IPT) for late-life depression in general practice: a feasibility study

Version: 3 Date: 12 February 2007

Reviewer: Patrick Raue

Reviewer's report:

General

The authors have nicely addressed all of my comments. They have appropriately reframed the study's goal from feasibility to "uptake and satisfaction" in the context of an effectiveness trial.

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None.

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None.

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

None.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
