Reviewer's report

Title: Cronkhite-Canada syndrome associated with rib fractures: a case report.

Version: 2 Date: 21 August 2010

Reviewer: Atsushi Irisawa

Reviewer's report:

There are no major revisions. There still are a few points to be corrected.

Minor revisions include spell miss and grammatically incorrect sentence.

1) Histological examination of the biopsy specimens from stomach showed adenomatous poly and from colon showed inflammatory polyp.

2) After one month of home nutrition support therapy, he was admitted to our hospital the third time to further improve his nutritional condition.

Is the sentence underlined grammatically correct?

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
