Title: Laparoscopic versus conventional appendectomy - a meta-analysis of randomized controlled trials

Version: 1 Date: 18 July 2010

Reviewer: Ray Garry

Reviewer’s report:

This is a well written meta-analysis of an important topic. You have followed standard Cochrane protocols and I think this paper would make a useful addition to the literature

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
