Reviewer's report

Title: Trends in Liver Transplantation for Primary Biliary Cirrhosis in The Netherlands 1988-2008

Version: 1 Date: 28 April 2010

Reviewer: helena Isoniemi

Reviewer's report:

It would valuable for this manuscript if the authors can include the overall incidence of PBC in Netherlands during the two study periods. Is it remained the same and only the incidence of transplantation in PBC is decreased or is the incidence in transplantation decreased due to decreased overall incidence of PBC

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
