Reviewer's report

Title: Angiotensin II receptor expression and relation to Helicobacter pylori-infection in the stomach of the Mongolian gerbil

Version: 9 Date: 2 December 2009

Reviewer: Hiroto Miwa

Reviewer's report:

Even after the revision, reliability of data of the study is limited because this is basically observational and descriptive, which requiring validation and reconfirmation of following researches. However, as they clearly showed that these receptors expression go with inflammation of H.pylori, this study may serve as a stepping stone for the future study regarding this topic.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
