Reviewer's report

Title: Drain tube migration into the anastomotic site of an esophagojejunostomy for gastric small cell carcinoma: short report

Version: 1 Date: 8 February 2010

Reviewer: Razvan Scurtu

Reviewer's report:

The case report entitled „ Drain tube migration into the anastomotic site of an esophagojejunostomy for gastric small cell carcinoma: short report” by Peng-Sheng Lai et al provides interesting informations on an very unusual situation. The report may be accepted for publication.

Discretionary revisions
For instance it will be useful to understand why the drain was kept in place for about a month ? It will also be very useful to understand why the authors had to retrieve the drain under endoscopic guidance?

Minor essential revisions
The authors should review the figures number since in the legends appear to be 1A and 1B while in the text the figures are marked as 1 and 2 respectively.

Level of interest: An article of limited interest

Quality of written English: Acceptable
