Reviewer’s report

Title: Acute Retroperitoneal Bleeding due to Inferior Mesenteric Artery Aneurysm

Version: 1 Date: 26 July 2009

Reviewer: Onur Goksel

Reviewer’s report:

This case report presents a rare form of visceral aneurysms associated with SMA and coeliac artery occlusive disease. English language, besides very occasional and insignificant errors (e.g. hemostasis vs. hemostasia) is appropriately used and the general format of the article is optimal. There are no major flaws requiring revision; however, more emphasis on endovascular techniques in the emergency settings is necessary in discussion for a major improvement of the article.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
