Reviewer’s report

Title: A survey of abnormalities in the colon and rectum in patients presenting with haemorrhoids.

Version: 2 Date: 13 April 2010

Reviewer: Varghese P Thomas

Reviewer’s report:

I have gone through the revised article and the authors have attempted to answer some of the queries.

1. As such the paper is in a better shape with change in the title and it is acceptable for publication with minor revisions

2. As the authors did not remove data from sigmoidoscopy in their revised paper, this could be mentioned as one of the limitations of the study.
