Reviewer's report

Title: Case report: Acute Pancreatitis Caused By Postcholecystectomy Hemobilia.

Version: 5 Date: 7 May 2010

Reviewer: Michael Kelly

Reviewer's report:

There are still some unanswered questions and there is still a lack of detail. The authors now have a nice case report that I am sure will be publishable in a case report journal but I am sorry to say that I do not think it is appropriate for BMC gastroenterology.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
