Reviewer's report

Title: Granulocytic sarcoma of the pancreas: A case report and review of the literatures

Version: 1 Date: 30 January 2010

Reviewer: massimo breccia

Reviewer's report:

Rong et al described a case of granulocytic sarcoma of the pancreas. Unfortunately this paper did not add particular and important informations as compared to previous published data. It is a confirmatory single case report. Others reports included not a single case, but small series of patients highlighted the importance of intensive chemotherapy in isolated GS without bone marrow infiltration. This paper must include the type of therapy and post-consolidation therapy the patient made.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
