**Title:** Mucosal atrophy in collagenous colitis: A case report

**Version:** 2 **Date:** 24 May 2011

**Reviewer:** Magnus Ström

**Reviewer's report:**

I think the revision is adequate the way things are without access to the original biopsies from 1998 which is a major shortcoming. However the observation and the discussion are of interest to those with closely related research. Minor essential revision: Check the figure number
