Reviewer’s report

Title: Spontaneous remission of Crohn's disease following a febrile infection: case report and literature review

Version: 1 Date: 24 December 2010

Reviewer: Filip J Baert

Reviewer’s report:

The authors report on a rare but potentially interesting observation from a pathogenic point of view.

However I recommend to considerably shorten the report to the essential message and leave all speculations.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
