Reviewer’s report

Title: Unusual Manifestation of Erdheim-Chester Disease

Version: 1 Date: 19 April 2011

Reviewer: Maria Grazia Sabbadini

Reviewer’s report:

This is an interesting case report, that describes a novel and rare localization of the disease. The manuscript is well-written and clear. In the second paragraph of the Discussion, the reference to the Veyssier-Belot diagnostic criteria is correct but may be misleading - I would suggest to state more clearly that it is not necessary that both criteria are satisfied.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
