Reviewer's report

Title: Modified endoscopic submucosal dissection with enucleation for treatment of gastric subepithelial tumors originating from the muscularis propria layer

Version: 2 Date: 12 August 2012

Reviewer: Seok-Reyol Choi

Reviewer's report:

Dear Author

I appreciate for your effort to incorporate many kinds of information in this paper. I am satisfied with your amendment. Furthermore, I would like to say that this kind of technique will improve patients' quality of life, especially lesions at cardia or upper body. I hope you make another advance. I think that this current form is available for publishing.

I will be waiting for another advance in the near future.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
