Reviewer's report

**Title:** A Prospective Experimental study of liver fibrosis with ultrasound and Its Correlation with hepatic reserve function and hemodynamics

**Version:** 3  **Date:** 2 August 2012

**Reviewer:** K-C Sudhamshu

**Reviewer's report:**

I could not see the reply to my comments. However, while going through the manuscript it seems that some points are clarified and manuscript is revised. Is it possible to ask for the reply to comments and revised manuscript indicating the changes that have been made?

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
