Reviewer's report

Title: Role of Vitamin K2 in Preventing the Recurrence of Hepatocellular Carcinoma after Curative Treatment. A Meta-Analysis of Randomized Controlled Trials.

Version: 2 Date: 19 October 2012

Reviewer: Masataka MS Seike

Reviewer's report:

The manuscript has been revised well. I think this manuscript will be acceptable after some corrections have been done.

Major Compulsory Revisions

1. In Abstract(Result), the sentence which “The corresponding absolute risk reductions in participants taking Vitamin K were -0.13(95%CI,-0.32 to -0.06) for recurrence of hepatocellular carcinoma at 1 year” is confusing, since this result has not been defined in the Result.

2. The authors use mixed the both “vitamin K” and “vitamin K2” throughout the manuscript. I think better to replace the word "vitamin K" with "vitamin K2".

Minor Essential Revisions

1. There are some typographical errors and inappropriate signs as comma, period, parentheses e.t.c, throughout the manuscript. Please check them.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
