Author's response to reviews

Title: Diabetes and insulin use are linked to Helicobacter pylori eradication

Authors: Chin-Hsiao Tseng (ccktsh@ms6.hinet.net)

Version: 2 Date: 19 October 2011

Author's response to reviews: see over
October 19, 2011

Dear Editor,

The manuscript has been revised according to your comments. Followings are responses to your specific queries:

1. We would like to ask you to clarify whether you sought ethical approval to conduct this study, and if so please proved full details of the approving committee. (please refer to the text below)

   Ethics:  Experimental research that is reported in the manuscript must have been performed with the approval of an appropriate ethics committee. Research carried out on humans must be in compliance with the Helsinki Declaration (http://www.wma.net/e/policy/b3.htm), and any experimental research on animals must follow internationally recognized guidelines. A statement to this effect must appear in the Methods section of the manuscript, including the name of the body which gave approval, with a reference number where appropriate.

   Response: Thank you. This has been added in the revised version. Please refer to the first paragraph of “Study population” on page 4, and the “Acknowledgments” on page 10.

2. Please clarify the type of data used, and whether it is publicly available and de-identified.

   Response: Yes. Please refer to the first paragraph of “Study population” on page 4.

3. Structure:  Please check the instructions for authors on the journal website to ensure that your manuscript follows the correct structure for this journal and article type.

   Response: The correct structure has been followed.

Sincerely yours,

Chin-Hsiao Tseng, MD, PhD
