Reviewer’s report

Title: Interval colon cancer in a Lynch syndrome patient under annual colonoscopic surveillance: A case for advanced imaging techniques?

Version: 1 Date: 28 February 2012

Reviewer: Maria Pellise

Reviewer’s report:

This case report deals with an infrequent disease and the case illustrates very appropriately a relevant situation where the clinician has to be aware. It is very well written and the comprehensive discussion made it advisable for publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
