Reviewer’s report

Title: Interval colon cancer in a Lynch syndrome patient under annual colonoscopic surveillance: A case for advanced imaging techniques?

Version: 1 Date: 22 April 2012

Reviewer: Suzanne Skoog

Reviewer's report:

Discretionary Revisions:
1. recommend using "surveillance" rather than "screening" in conclusion paragraphs 1, 6 (2 changes), and 8.
2. with the recent change to "split" preps, it would be interesting to know if the prep had changed from year 2009 to 2010. This change in bowel preparation may help reduce missed right sided lesions as well.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
