Reviewer's report

Title: Prevalence and risk factors of Helicobacter pylori infection in Korea; Nationwide multicenter study over 13 years

Version: 2 Date: 24 May 2013

Reviewer: Leonardo Henry H Eusebi

Reviewer's report:

The Authors have revised the article as suggested, I do not have further comments.

The article presents new data on h.pylori’s epidemiology over the last 13 years in Korea, however it is a very specific topic, interesting exclusively for experts in the field

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
