Reviewer's report

Title: Synchronous Appendiceal and Intramucosal Gastric Signet Ring Cell Carcinomas in an Individual with CDH1-associated Hereditary Diffuse Gastric Carcinoma: a Case Report of a Novel Association and Review of the Literature

Version: 1 Date: 7 June 2013

Reviewer: Theodore Liakakos

Reviewer's report:

The authors are presenting the first case in the literature of an appendiceal signet ring cell carcinoma with synchronous CDH1-associated hereditary diffuse gastric cancer in a female patient. They also make a comprehensive analysis of the current literature about familial gastric cancer and associated malignancies.

Though I would have thought that they should had focused more on coexisting other malignancies I think that their report adds to the literature and should be published.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
