Reviewer's report

Title: Detection and treatment of an aneurysma spurium of the arteria hepatica dextra after laparoscopic cholecystectomy

Version: 1 Date: 22 May 2013

Reviewer: Nigel Bird

Reviewer's report:

An interesting and unusual complication of surgery, but one that is known. However, this report is worthy of publication provided that the English is attended to. Some careful editing is also required; notably the authors use 'arteria hepatica dexter' in several places, when they really mean arteria hepatica dextra.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
