Reviewer's report

**Title:** High expression level and nuclear localization of Sam68 are associated with progression and poor prognosis in colorectal cancer

**Version:** 7 **Date:** 6 March 2013

**Reviewer:** Claudio Sette

**Reviewer's report:**

The authors have addressed the criticisms raised by this Reviewer. The text shows several language mistakes that should be corrected in order to improve the understanding of the results presented.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare no conflict of interests
