Reviewer's report

Title: A synergistic interaction between transcription factors nuclear factor-kappaB and signal transducers and activators of transcription 3 promotes gastric cancer cell migration and invasion

Version: 2 Date: 3 January 2013

Reviewer: sergei I. grivennikov

Reviewer's report:

Authors have improved the manuscript significantly and I think it is acceptable in its current form. I agree that in their system 'metastasis assay' will be difficult to perform (especially within the reasonable timeframes) and therefore these experiments should not further delay the publication of this paper

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
