Reviewer's report

Title: Linear Echoendoscope-Guided ERCP for the Diagnosis of Occult Common Bile Duct Stones

Version: 4 Date: 21 December 2012

Reviewer: Hjalmar van Santvoort

Reviewer's report:

The authors have provided good answers to the points raised in my previous review. However, not all answers (especially when requesting additional data) have also been added in some form to the revised paper. Please go through your rebuttal once more and revise the paper accordingly, so the future reader will not have the same questions as I did.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
