  The authors agree that COX-1 mRNA level will be a good control in their study (#3). Given that cDNAs from patients have already been generated, it is an easy experiment to do. COX-1 level will be an important control to show in comparison to the disease relevant COX-2 level.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
