Reviewer's report

Title: Modelling the impact of improving screening and treatment of chronic hepatitis C virus infection on future hepatocellular carcinoma rates and liver-related mortality

Version: 2 Date: 7 May 2014

Reviewer: John Dillon

Reviewer's report:

This is a well written report of a model adjusted to England's specific HCV epidemiology and demonstrates the benefits of treatment. I suggest no revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests
