Reviewer's report

Title: Long term follow-up and liver-related death rate in patients with non-alcoholic and alcoholic related fatty liver disease

Version: 1 Date: 15 July 2014

Reviewer: Mattias Ekstedt

Reviewer's report:

Thank you for your constructive comments. I agree with the changes made to the manuscript, and compliment all authors on a job well done.

In Table 1 mean, median and IQR are presented. To me, it is clearer if you choose mean plus standard deviation for normally distributed variables, and median IQR for not normally distributed.

If possible, add the number of individuals at risk at different time points in the Kaplan-Meier curves.

I have nothing further.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
