Reviewer's report

Title: Ulcerative Jejunitis in a Child with Celiac Disease

Version: 2 Date: 25 July 2013

Reviewer: Matthew Kurien

Reviewer's report:

Many thanks for the opportunity to review this case report.

This work adds to the literature by being the first reported pediatric case of ulcerative jejunitis seen in celiac disease.

The work is well written and I have no major concerns. I would just recommend a minor revision for consistency keeping the term Type 1 or 2 RCD throughout as opposed to RCD Type 1, which is used at the end of the first paragraph in the discussion.

Level of interest: An article of importance in its field
