Reviewer’s report

Title: 13C-Urea Breath Test Threshold Calculation and Evaluation for the Detection of Helicobacter pylori Infection in Children

Authors:

Ralf Herold (ralf.herold@charite.de)
Michael Becker (michael.becker@charite.de)

Version: 2 Date: 7 May 2002

Reviewer: Prof Francois Mion

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept without revision

My original criticisms have been taken into account by the authors.
I think this paper is now acceptable for publication.

Competing interests:
