Reviewer's report

Title: Antral hyperplastic polyp causing intermittent gastric outlet obstruction: Case report

Authors:
- Dr Rasim Gencosmanoglu (rgencosmanoglu@marmara.edu.tr)
- Ebru Sen-Oran (ebrusenoran@hotmail.com)
- Ozlem Kurtkaya-Yapicier (ozlemky@yahoo.com)
- Nurdan Tozun (nurdantozun@hotmail.com)

Version: 1 Date: 16 Jun 2003

Reviewer: Murat Alper

Level of interest: A paper of considerable general medical or scientific interest

Advice on publication: Accept after discretionary revisions

Abstract: proper
Background: proper
Case presentation: proper
Conclusion: proper
References:
- Twenty one references are too many for this case report. The focus of the paper is intermittent gastric outlet obstruction. Therefore many references are not necessary for the relation between gastric cancer and hyperplastic polyp. I suggest to the authors to benefit from the paper "Large pedunculated antral hyperplastic gastric polyp traversed the bulbus causing outlet obstruction and iron deficiency anemia: endoscopic removal. World J Gastroenterol. 2003 Mar;9(3):633-4" by Alper M, Akcan Y, Belenli O.

- In the references section, journal titles should be written in italic type.
