Reviewer's report

Title: Jejunal microvilli atrophy and reduced nutrient transport in rats with advanced liver cirrhosis: improvement by Insulin-like Growth Factor I (IGF-I)

Version: 5 Date: 4 May 2004

Reviewer: Jordi J Muntanès

Reviewer's report:

General

The authors have answered point-by-point all my question in relation to the previous version of the manuscript. In my opinion, the revised version is ready to be published.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The don't need to add more information in the revised version

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

OK

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

No discretionary revisions

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
