Reviewer's report

Title: Nitric oxide—an endogenous inhibitor of gastric acid secretion in isolated human gastric glands

Version: 2 Date: 19 July 2004

Reviewer: Lars Fandriks

Reviewer's report:

General
The paper has improved considerably following revision and I now find it acceptable for publication in BMC Gastroenterology. However, the authors are advised to omit the word "gastric" on line 15 in Background as the references 9-11 all relate to duodenal bicarbonate secretion.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
