Reviewer's report

Title: Tissue detection of natural killer (NK) cells in colorectal adenocarcinoma.

Version: 1 Date: 15 June 2004

Reviewer: Jesse Lachter

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The English needs a little work.
The paper is wordy, and its message, which is essentially a negative result, is one worthy of publication, but in a much shortened form.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No

Declaration of competing interests:
