Reviewer’s report

Title: Measurement of the total antioxidant response using a novel automated method in subjects with nonalcoholic steatohepatitis

Version: 7 Date: 24 August 2005

Reviewer: Luis A. A Videla

Reviewer’s report:

General

-----------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Major compulsory revisions indicated in my report were introduced in the revised version of the work satisfactorily.

-----------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

All minor essential revisions were carried out satisfactorily in the revised version of the paper.

-----------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

Correlation coefficients and significance of correlations were added to the figures in the revised version.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
