Reviewer's report

Title: Rhinosinusitis derived Staphylococcal enterotoxin B plays a possible role in the pathogenesis of food allergy

Version: 1 Date: 17 May 2006

Reviewer: Francesca Levi-Schaffer

Reviewer's report:

General

The methodology is at the standards of the state of the art. The methodology description is also clear and well-written. In conclusion, the methodology is fine.

-------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
