Reviewer's report

Title: Reactive Lymphoid Hyperplasia of the Liver in a Patient with Colon Cancer: Report of Two Cases

Version: 1 Date: 19 July 2006

Reviewer: Basilio Papaziogas

Reviewer's report:

General
This is an interesting manuscript describing two cases of reactive lymphoid hyperplasia in two patients with colon cancer. The description of the two cases is complete, as well as the documentation with images. The references are up to date and the discussion focused. I suggest this paper for publication in BMC Gastroenterology.

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
In Case 1: Please explain "type-2 tumor"

----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
