Reviewer's report

Title: Effect of resveratrol on alcohol induced mortality and liver lesions in mice

Version: 1 Date: 18 September 2006

Reviewer: Vladislav Eybl

Reviewer's report:

General
Paper with new findings useful for practise and further research

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Complete literature references with papers published in 2006, results from paragraph "Laboratory findings" would be better to put into the figures or tables.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Improve the explanatory note to figures, more details and necessary

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes
