Reviewer's report

Title: Stent versus gastrojejunostomy for the palliation of gastric outlet obstruction: a systematic review

Version: 1 Date: 12 March 2007

Reviewer: Todd Baron

Reviewer's report:

General
excellent review, very comprehensive

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Discretionary Revisions (which the author can choose to ignore)
On page 12, paragraph 2, one of the other factors which may contribute to the wide variation in complications (as well as success) is operator experience.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
