Reviewer’s report

Title: Total and caspace-cleaved cytokeratine 18 in chronic cholecystitis: A prospective study

Version: 1 Date: 8 January 2008

Reviewer: Hendrik Jan Ankersmit

Reviewer’s report:

I have taken a look at this paper and I would accept it, the work is performed in a sound manner, the conclusion is acceptable. Accept without alteration, bibliography can be altered to evidence that ccCK-18 was shown to be increased in acute liver failure, to my knowledge there are three citations.
